Psychology Of Serial Killers | b69c44cc2f4e583ff4a913b3b1cb96aa

Neuropsychology of Criminal Behavior

Whether it be Jack the Ripper in nineteenth-century England or Ted Bundy in 1970s America, the public has always been fascinated by the criminal offender type known as the serial killer. Professionals continue to speculate and develop new theories about their identity decades after their crimes ended. But what is it that causes such evilness in individuals that causes them to take an innocent life, not once but multiple times, and for no apparent reason beyond their own perverse psychological gratification? This fascinating book explores this question by looking at the psychosocial determinants of criminal behavior, including serial murder. The role of such internal processes as attachment, moral development, and identity formation in the development of a person’s predisposition to various forms of deviance, including physical and sexual aggression, is applied to actual serial killers, including David Berkowitz (The Son of Sam), Charles Manson, Eric Rudolph (God’s Crusader), Ted Bundy (The Face of Evil), Edmund Kemper (The Co-ed Killer), and the Zodiac Killer, in an effort to construct a psychosocial profile of each and to attempt to pinpoint the various developmental factors that contributed to their eventual criminality. Finally, early intervention strategies are explored that can potentially redirect a child’s developmental trajectory away from crime and deviance, and toward a more adaptive and socially acceptable behavioral repertoire. This book will be an insightful resource to all law enforcement professionals, policymakers, police academicians, psychologists, psychiatrists, and many others in the helping professions as well.

Serial Killers

Ted Bundy, BTK, Lonnie Franklin Jr., (the Grim Sleeper), and Anthony Sowell (the Cleveland Strangler) what made these men into serial killers? Examination by authorities and professionals has given some insight into the minds of these serial killers and others, and psychology students will learn about the most current psychoanalysis of these modern-day murderers. The text also includes a personality disorder self-assessment quiz readers can take to learn more about psychopathy—the most common psychological condition for serial killers.

My Life Among the Serial Killers

"Fans of Mindhunter and true crime podcasts will devour these chilling stories of serial killers from the so-called “surge” or epidemic years of serial murder. With books like Serial Killers, Female Serial Killers, and Sons of Cain, Peter Vronsky has established himself as the foremost expert on the history of serial killers. In this first definitive history of the worst decades of American serial murder, when the number and body count of serial killers exploded, Vronsky tells the stories of the most notable and unusual serial killings from the 1950s to the early twenty-first century. From Ted Bundy to the Golden State Killer, our fascination with these classic serial killers seems to grow by the day. American Serial Killers gives true crime junkies what they crave, with both perennial “favorites” (Ed Kemper, Jeffrey Dahmer) and many fascinating lesser-known killers such as Melvin Rees, Harvey Glatman and Danny Rolling”--

SERIAL KILLERS

In-depth analysis and comprehensive text delve into the psychology of medical serial killers, such as Dr. Michael Swango and Dr. Harold Shipman, in order to examine their motives, behaviors, and methods. Readers can also take a personality disorder self-assessment quiz to learn more about psychopathy—the most common psychological condition for serial killers.

Why We Love Serial Killers

This book introduces a novel approach to analysing and mapping criminal behaviours. Every crime occurs as a chain of behaviours and events, from inception and preparation through to commission and exit from the crime scene. These pathways in crime are complex, dynamic sequences that are by their very nature difficult to analyse. Keatley provides a clear and coherent introduction to Behaviour Sequence Analysis, and the chapters address a wide range of criminal offences, from deception in interrogations through to sexual assaults, serial homicide, and terrorism. Interesting additional similarities between Behaviour Sequence Analysis and other well-known methods, such as crime linkage, crime script analysis, and T-Pattern Analysis are also outlined in detail. Academic researchers in Forensic Psychology and Criminology, as well as applied practitioners and investigators will find this an invaluable book, and will gain clear insight and understanding into the method in order to apply it to their own cases.

The Psychology of Serial Killer Investigations: The Grisly Business Unit

A comprehensive examination into the frightening true crime history of serial homicide—including information on America’s most prolific serial killers such as: Ted Bundy • “Co-ed Killer” Ed Kemper • The BTK Killer • “Highway Stalker” Henry Lee Lucas • Monte Ralph Rissell • “Shoe Fetish Slayer” Jerry Brudos • “Night Stalker” Richard Ramirez • “Unabomber” Ted Kaczynski • Ed Gein “The Butcher of Plainfield” • “Killer Clown” John Wayne Gacy • Andrew Cunanan • And more In this unique book, Peter Vronsky documents the psychological, investigative, and cultural aspects of serial murder, beginning with its first recorded instance in Ancient Rome through fifteenth-century France on to such notorious contemporary cases as cannibalphilophile Ed Kemper, the BTK killer, Henry Lee Lucas, Monte Ralph Rissell, Jerry Brudos, Richard Ramirez, “Unabomber” Ted Kaczynski, Ed Gein, John Wayne Gacy, Ted Bundy, and the emergence of what he classifies as the “serial rampage killer” such as Andrew Cunanan, who murdered fashion designer Gianni Versace. Vronsky not only offers sound theories on what makes a serial killer but also makes concrete suggestions on how to survive an encounter with one—from recognizing verbal warning signs to physical confrontational resistance. Exhaustively researched with transcripts of interviews with killers, and featuring up-to-date information on the apprehension and conviction of the Green River killer and the Beltway Snipers, Vronsky’s one-of-a-kind book covers every conceivable aspect of an endlessly riveting true crime phenomenon.

Learn what goes on in the Criminal Mind of a Serial Killer HALL OF FAME / TOP 10 REVIEWER J. Chambers

Gave this book 4 stars! Scroll down to read his review! Get Inside The Twisted Mind of a Serial Killer! To the untrained eye, a serial killer looks just like any other member of the public. They wear the same clothes, they eat the same food and they go about their daily lives, as any normal person would do. But there is a difference in them, which is unquantifiable; it is the deadly secret that all serial killers hide from the outside world. If they weren’t able to conceal this secret so well, many cold-blooded killings could have been prevented. So if we could see deep within their souls and spot the things that made them the way they are, maybe we could stop them from becoming serial killers in the first place. With this book, I aim to get inside the mind of a serial killer, to show what makes them tick and to see if there are any personality traits that are the same across the wide range of different serial killers there have been through time. Finally, I will take a look at the top 5 serial killer personalities and 10 of the most famous serial killers in history. This will give us an insight into the mind of a serial killer and a better understanding of the things that turn people into cold and calculating killing machines. Do you find Serial Killers interesting? Would you like to get a glimpse inside the mind of a serial killer? Then Get This Book NOW! Criminal Psychology: The Criminal Mind of a Serial Killer Related Topics: Dark Psychology, Criminal mind, Criminal profiling, understanding criminals, sociology, criminology, victimology.

Serial Murderers and Their Victims

This book draws on findings from psychology, neurology, and genetics, to offer a multi-dimensional analysis of criminal behavior. It explores the biological bases of emotions such as aggression, anger, and hostility and how they-- combined with social psychological influences, such as family history and environmental conditions-- may lead to violence. Specific case studies, including serial killings, mass murders, family violence, cannibalism, and hitmen, are referenced throughout, providing real-world examples of these theories in action. Issues of free will and the law are discussed as well as suggestions for curbing violent behavior.

The Psychology of Serial Killer Investigations

Drawn from more than 150 hours of exclusive tape-recorded interviews with Bundy, this collection provides shocking insights into the killer's 11th-hour confessions before his death in a Florida electric chair. A unique, horrifying self portrait of one of the most savage sex killers in history.

Serial Killers

This text provides an in-depth, scholarly examination of serial murderers and their victims. Supported by extensive data and research, the book profiles some of the most prominent murderers of our time, addressing the highest-profile serial killer type—sexual psychopath—alongside a wide variety of other types (male, female, team, healthcare, and serial killers from outside the U.S.). Author Eric Hickey examines the lives of over 400 serial murderers, analyzing the cultural, historical, and religious factors that influence our myths and stereotypes of these individuals. He describes the biological, psychological, and sociological reasons for serial murder and discusses profiling and other law enforcement issues related to the apprehension and disposition of serial killers. Important Notice: Media content referenced within the product description or the product text may not be available in the ebook version.

Ted Bundy

Did you know your brain has superpowers? Berit Brogaard, PhD, and Kristian Marlow, MA, study people with astonishing talents—memory champions, human echolocators, musical virtuosos, math geniuses, and synesthetes who taste colors and hear faces. But as amazing as these abilities are, they are not mysterious. Our brains constantly process a huge amount of information below our awareness, and what these gifted individuals have in common is that through practice, injury, an innate brain disorder, or even more unusual circumstances, they have managed to gain a degree of conscious access to this potent processing power. The Superhuman Mind takes us inside the lives and brains of geniuses, savants, virtuosos, and a wide variety of ordinary people who have acquired truly extraordinary talents, one way or another. Delving into the neurological underpinnings of these abilities, the authors even reveal how we can acquire some of them ourselves—from perfect pitch and lightning fast math skills to supercharged creativity. The Superhuman Mind is a book full of the fascinating science readers look for from the likes of Oliver Sacks, combined with the exhilarating promise of Moonwalking with Einstein.

VRONSKY/FEMALE SERIAL KILLERS

The Psychology of Serial Killer Investigations

Examines the variety of serial killers and explains how they work, why they do what they do, who they are and what makes them kill

Psychopathy, Perversion, and Lust Homicide

This is the first book of its kind that combines state-of-the-art psychological assessment experience with the expertise of a homicide investigator who has tracked some of this country’s most notorious serial killers.

Serial Killer Groupies

Containing profiles of several of the most famous serial killers throughout history such as Jack the Ripper and H. H. Holmes, this in-depth analysis of the killers’ minds, behavior, and actions will surely intrigue any psychology student. Comprehensive text explains the life and crimes of these prolific killers from history, and a personality disorder self-assessment quiz will give readers insight into psychopathy—the most common psychological condition for serial killers.

The Serial Killers

Serial killers like Seattle’s Ted Bundy, Maryland’s Beltway Sniper, Atlanta's Wayne Williams, or England’s Peter Sutcliffe usually outsmart the task forces on their trail for long periods of time. Keppel and Birnes take readers inside the operations of serial killer task forces to learn why. What is the underlying psychology of a serial killer and why this defeats task force investigations? This is the first book of its kind that combines state-of-the-art psychological assessment experience with the...
expertise of a homicide investigator who has tracked some of this country's most notorious serial killers. The author also brings to the book hands-on best practices gleaned from the experience of other task forces. Readers, both professionals and students, will benefit from the comprehensive and critical case reviews, the analysis of what went wrong, what went right, and the after-action recommendations of evaluators in the US, UK, and Canada. The book covers: * The nature of the psychology of a serial killer * How crime assessment profiling reveals that psychology * Why psychological profiles fail * How serial killer task forces defeat themselves * How the media can, and usually does, undermine the task force operation * The big secret of all serial killer investigations: police already have the killer's name * The best practices for catching a serial killer * Comprehensive case reviews of some of the US's and UK's most baffling serial killer cases * A list of best practices for serial killer task force investigators * Recommendations for how to manage comprehensive files and computer records * Practical advice on how to manage the media: what to say and not to say * Insight into what a serial killer might be thinking and doing to stay away from police * Recommendations for setting up and administering long-term investigations * Practical tips on how to maintain a task force's psychological edge and avoid defeatism

The Killer Book of Serial Killers

This bestselling book has become a staple of every serious true crime book collector's library. One of the most reliable concise sources of information available about serial killers and their crimes, this book offers a psychological and sociological analysis of this most frightening yet fascinating criminal. Psychologist David Lester, recognized worldwide as a leading authority on death-in both the fields of suicide and homicide-offers a much-needed assessment of whether or not there is a dependable and useable psychological profile of the serial killer. Separating the facts from the myths by combining documented case histories of notable serial killers with behavioral research, Serial Killers: The Insatiable Passion has been welcomed and applauded as an important addition to the literature on serial killers by criminologists, psychologists, sociologists, law enforcement and true crime buffs alike.

Historical Serial Killers

To understand the minds of serial killers, a journalist embarks on a disturbing project. Speaking first-hand to convicted serial killers and the psychiatrists and criminologists study their crimes, she gives a nuanced and troubling report on the personalities and motivations of men who have committed unthinkable crimes.

Pathways in Crime

Explores the criminal patterns and motives of serial killers, from the Lonely Hearts Killer of the 1950s to such infamous figures as Jeffrey Dahmer, Ted Bundy, and John Wayne Gacy. Reissue.

Signature Killers

This book presents an in-depth psychological analysis of the development of the serial killer personality that will fascinate all readers, from the experienced criminology student to the casual true-crime reader. • Includes eight case studies of fascinating serial criminals, including recently convicted media stars Rodney Alcala and Anthony Sowell

Inside the Minds of Serial Killers

This book brings together an international collection of research literature on the topics of criminal profiling and serial violent crime by integrating the respected insights of both scholars and practitioners from around the globe. It explains etiological factors and psychological mechanisms to reveal criminal motives.

American Serial Killers

Over the course of twenty-five years, Dr. Helen Morrison has profiled more than eighty serial killers around the world. What she learned about them will shatter every assumption you've ever had about the most notorious criminals known to man. From appearances, Dr. Helen Morrison has an ordinary life in the suburbs of a major city. She has a physician husband, two children, and a thriving psychiatric clinic. But her life is much more than that. She is one of the country's leading experts on serial killers, and has spent as many as four hundred hours alone in a room with depraved murderers, digging deep into killers' psyches in ways no profiler before ever has. In My Life Among the Serial Killers, Dr. Morrison relates how she profiled the Mad Biter, Richard Ottosz Blazeck, who chewed on his victims' body parts, stalked Dr. Morrison, then believed she was his wife. She did the last interview with Ed Gein, who was the inspiration for Alfred Hitchcock's Psycho. John Wayne Gacy, the clown-obsessed killer of young men, sent her crazed Christmas cards and gave her his paintings as presents. Then there was Atlanta child killer Wayne Williams; rapist turned murderer Bobby Joe Long; England's Fred and Rosemary West, who killed girls and women in their "House of Horrors"; and Brazil's deadliest killer of children, Marcelo Costa de Andrade. Dr. Morrison has received hundreds of letters from killers, read their diaries and journals, evaluated crime scenes, testified at their trials, and studied photos of the gruesome carnage. She has interviewed the families of the victims -- and the spouses and parents of the killers -- to gain a deeper understanding of the killer's environment and the public persona he adopts. She has also studied serial killers throughout history and shows how this is not a recent phenomenon with psychological autopsies of the fifteenth-century French war hero Gilles de Rais, the sixteenth-century Hungarian Countess Bathory, H. H. Holmes of the late nineteenth century, and Albert Fish of the Roaring Twenties. Through it all, Dr. Morrison has been on a mission to discover the reasons why serial killers are compelled to murder, how they choose their victims, and what we can do to prevent their crimes in the future. Her provocative conclusions will stun you.

Female Serial Killers

American Evil deals with the 'sordid' world of serial killers, their calculating methods and distorted thinking, based around the author's ground-breaking work as a prison psychologist, government advisor and consultant to three TV series including Voice of a Serial Killer. Based on clinical experience of killers. Includes a selection of USA/UK serial killer studies. Exposes police and other failings and shortcomings and the perversity of 'defences', 'excuses', etc. Strongly critical of USA gun laws and attitudes or perspectives making for an unhealthy environment, moral vacuum and lack of official/individual awareness and responsibility. The book describes how the author was 'so profoundly moved' by his inescapable conclusions about how serial killers are 'made' that he was compelled to set out his findings. Bemoaning the serial killer 'growth industry', 'unhealthy interest' and ill-informed comment he sets the record straight. Serial killers are made not born. But his central polemic is that serial killers are one of several malign human by-products of a dysfunctional modern permissive society, overwhelmingly American, brought about by modern-day culture in the USA, lax moral standards as also reflected in other countries to the extent that they pursue a comparable way of life.

Modern-Day Serial Killers
From Lady Elizabeth Bathory to Bell Guinness to Aileen Wuornos, this book takes an in-depth approach to evaluating the life and crimes of some of the world's most vicious women, who are grouped into chapters by psychological type. Readers can also take a personality disorder self-assessment quiz to learn more about psychopathy: the most common psychological condition for serial killers.

Criminal Shadows

Tells the story of Ted Bundy, a brilliant law student executed for killing three women, who confessed to killing thirty-five others, from the perspective of the former policewoman, crime writer, and unwitting personal friend.

The Psychology of Serial Killers

Serial killers like Seattle's Ted Bundy, Maryland's Beltway Sniper, Atlanta's Wayne Williams, or England's Peter Sutcliffe usually outward the task forces on their trail for long periods of time. Keppel and Birnes take readers inside the operations of serial killer task forces to learn why. What is the underlying psychology of a serial killer and why this defeats task force investigations? This is the first book of its kind that combines state-of-the-art psychological experience with the expertise of a homicide investigator who has tracked some of this country's most notorious serial killers. The author also brings to the book hands-on best practices gleaned from the experience of other task forces. Readers, both professionals and students, will benefit from the comprehensive and critical case reviews, the analysis of what went wrong, what went right, and the after-action recommendations of evaluators in the US, UK, and Canada. The book covers: * The nature of the psychology of a serial killer * How crime assessment profiling reveals that psychology * Why psychological profiles fail * How serial killer task forces defeat themselves * How the media can, and usually does, undermine the task force operation * The big secret of all serial killer investigations: police already have the killer's name * The best practices for catching a serial killer * Comprehensive case reviews of some of the US's and UK's most baffling serial killer cases * A list of best practices for serial killer task force investigators * Recommendations for how to manage comprehensive files and computer records * Practical advice on how to manage the media: what to say and not to say * Insight into what a serial killer might be thinking and doing to stay away from police * Recommendations for setting up and administering long-term investigations * Practical tips on how to maintain a task force's psychological edge and avoid defeatism

Alone with the Devil

A psychologist takes a new look at the crimes and minds of serial killers, argues that they are destined to kill from an early age, and offers remedies to control this serious threat to society.

Serial Killers

Every crime casts a unique shadow that may be interpreted to lead the police to the criminal responsible. This book looks at "offender profiling" that helps the police to identify and track individual criminals by the nature of their crime.

Through the Eyes of Serial Killers

For decades now, serial killers have taken center stage in the news and entertainment media. The coverage of real-life murderers such as Ted Bundy and Jeffrey Dahmer has transformed them into ghoulish celebrities. Similarly, the popularity of fictional characters such as Hannibal "The Cannibal" Lecter or Dexter demonstrates just how eager the public is to be frightened by these human predators. But why is this so? Could it be that some of us have a gruesome fascination with serial killers for the same reasons we might morbidly stare at a catastrophic automobile accident? Or is it something more? In Why We Love Serial Killers, criminology professor Dr. Scott Bonn explores our powerful appetite for the macabre, while also providing new and unique insights into the world of the serial killer, including those he has gained from his correspondence with two of the world's most notorious examples, David Berkowitz ("Son of Sam") and Dennis Rader ("Bind, Torture, Kill"). In addition, Bonn examines the criminal profiling techniques used by law enforcement professionals to identify and apprehend serial predators, he discusses the various behaviors—such as the charisma of the sociopath—that manifest themselves in serial killers, and he explains how and why these killers often become popular cultural figures. Groundbreaking in its approach, Why We Love Serial Killers is a compelling look at how the media, law enforcement agencies, and public perception itself shapes and feeds the "monsters" in our midst.

American Evil

The Killer Book of Serial Killers is the ultimate resource (and gift) for any true crime fan and student of the bizarre world of serial killers. Filled with stories, trivia, quizzes, quotes, photos, and odd facts about the world's most notorious murderers, this is the perfect bathroom reader for anyone fascinated with serial killers. The stories and trivia cover such killers as: John Wayne Gacy Ted Bundy The BTK Killer Jack the Ripper The Green River Killer Serial killers around the world And many more! Bathroom readers have enjoyed considerable success as a format, selling millions of copies. The Killer Book series brings this format to the rabid true crime audience. Including more than 40 black & white photos, this is a must for true crime fans.

Profiling

Listening to Killers offers an inside look at twenty years' worth of murder files from Dr. James Garbarino, a leading expert psychological witness who listens to killers so that he can testify in court. The author offers detailed accounts of how killers travel a path that leads from childhood innocence to lethal violence in adolescence or adulthood. He places the emotional and psychological witness who listens to killers so that he can testify in court. The author offers detailed accounts of how killers travel a path that leads from childhood innocence to lethal violence in adolescence or adulthood. He places the emotional and moral damage of each individual killer within a larger scientific framework of social, psychological, anthropological, and biological research on human development. By linking individual cases to broad social and cultural issues and illustrating the social toxicity and unresolved trauma that drive some people to kill, Dr. Garbarino highlights the humanity we share with killers and the role of understanding and empathy in breaking the cycle of violence.

Murderous Minds

An exploration of criminal profiling that discusses its history, FBI crime scene analysis procedures, the development of a profile, crime signatures and rituals, and other related topics and offers details on more than fifty true crime cases.

Criminal Psychology

Get Inside the Mind of a Vicious Serial Killer Serial killers are a different breed of killer. They're people you know. People with families. They're often polite and cordial in public settings. They're often educated. And most times, they're just the guy-or...
girl-next-door. But deep beneath the polite and innocent looking exterior, lays a deranged sociopath that kills habitually—without a shred of mercy or remorse. Now, inside this book you’ll gain a firsthand understanding of why serial killers do what they do. You’ll discover the thought patterns, motives, and behavioral traits that set serial killers apart. You’ll know the inner workings of a serial killer’s mind, and what REALLY drives them to commit their horrendous acts. Download This Book Today and Discover the Inner workings of a Serial Killer’s Twisted Mind

Lost Boys
The psychologist examines trends in violence by young boys, analyzing his twenty-five years of work with violent adolescents to develop recommendations for preventive measures

The Superhuman Mind
To address the needs and interests of students taking psychology, this unique series focuses on the factors that create, motivate, and, ultimately, often lead to the capture of serial killers. Each book contains profiles of up to 25 serial killers grouped into chapters by psychological type. Readers will learn how killers are diagnosed and classified, and whether it’s possible to treat or cure them.

Serial Murder and the Psychology of Violent Crimes
“Part true crime, part neuroscience and a page-turner from start to finish,” this is a look at the biology behind violent psychopathic behavior (Kirkus Reviews). How many times have you seen a murder on the news or on a TV show like CSI: Crime Scene Investigation, and said to yourself, “How could they do something like that?” Today, neuroscientists are imaging, mapping, testing and dissecting the source of the worst behavior imaginable in the brains of the people who lack a conscience: psychopaths. Neuroscientist Dean Haycock examines the behavior of real life psychopaths and discusses how their actions can be explained in scientific terms, from research that literally looks inside their brains to understanding how psychopaths, without empathy but very goal-oriented, think and act the way they do. Some don’t commit crimes at all, but rather make use of their skills in the boardroom. But what does this mean for lawyers, judges, psychiatrists, victims, and readers—for anyone who has ever wondered how some people can be so bad. Could your nine-year-old be a psychopath? What about your co-worker? The ability to recognize psychopaths using the scientific method has vast implications for society, and yet is still loaded with consequences.

Medical Serial Killers
As the number of serial killers worldwide has risen steadily - from the emergence of Jack the Ripper in 1888 to Harold Shipman and Ivan Milat, the backpacker killer of the Australian outback - the need to understand mass murder is becoming more urgent. Using privileged access to the world’s first National Centre for the Analysis of Violent Crime, Colin Wilson and Donald Seaman bring you this incisive study of the psychology of serial killers and the motives behind their crimes. From childhood traumas to issues of frustration, fear and fantasy, discover what turns an ordinary human being into a compulsive killer.

Real-Life Monsters: A Psychological Examination of the Serial Murderer
This book delves into the twisted psychology of women attracted to some of the most notorious monsters on the planet, giving true crime readers real insight into this phenomena One of the most common reasons given by women who date serial killers is the fact that they ‘see’ the little boy that the horrible man once used to be, and they believe that they can nurture that kid, hence removing the cruel and harmful nature of the killers and making them amicable again. Known as ‘serial killer groupies’ or even ‘prison groupies’ by some, a great number of these women have shown a surprising desire to get connected to the serial killer of their choice. A large number of these women have become directly aligned with these killers, and some have even married these hardened criminals. Groupies will do almost anything to get close to the prisoner that they are attracted to. They give up jobs, family, spend money on him, and even move across country to be in the same town as him. Some SKG’s are attracted to the celebrity status they acquire. They go on talk shows to announce their undying love for the serial killer and proclaim that he was not capable of these killings. This book depicts several such cases and you’ll meet some of these SKG’s. “If you seek to understand or study the unexplainable, this book may be your key to some grasp of what is beyond imagining.why some women love serial killers!” -- (Bernard Lee DeLeo), bestselling author of over twenty-five novels and a leading author RJ Parker offers powerful insights into the needs, motivations and dark desires of women who pursue and sometimes marry the most infamous killers in history. This powerful psychological examination of these women is not to be missed. Well researched, Parker sheds new light on the curious sub-culture of groupies in his new true crime book, SERIAL KILLER GROUPIES” -- (Scott Bonn, PhD) Professor, criminologist and author of Why We Love Serial Killers: The Curious Appeal of the World’s Most Savage Murderers

Listening to Killers
“This book demonstrates how and why most serial murders are sexually motivated and fueled by a combination of psychopathy and sexual disorder. Dobbert offers a psychological and social profile of each killer. He examines the killer's early life, charting the development of Antisocial Personality Disorder and sexual disorders, including sexual sadism and necrophilia. Perhaps more important, he shows how early signs of these disorders were missed, mishandled, minimized, or ignored by professionals in law enforcement, education, health care, and criminal justice.”--BOOK JACKET.

Female Serial Killers
Profiles the author's career as a forensic psychiatrist, recounting the many frightening criminals he has faced, including the Hillside Strangler, Juan Corona, and members of the Manson family.
