Crisis Mangement in the New Strategy Landscape This volume focuses on Chinese society in the environment created by new media. It offers insights into Chinese public opinion for an international readership, and to promote the media literacy and crisis coping capacity of all social sectors by integrating multiple research perspectives, including journalism and communication, management, sociology, psychology, information security, etc. The volume is guided by an innovative “overarching public opinion research framework” as well as qualitative and quantitative research methods, and includes in-depth studies on: the status quo of Chinese social opinion and Internet public opinion, the developmental history of Chinese Internet public opinion over the past ten years (2003-2012), the online communication of public events, and public satisfaction with the government.

National Risk Mangement Survey We live in a crisis society, with traditional media responding on a minute-by-minute basis on daily, seemingly inevitable, organizational crises. Whether crises have become more prevalent or we're simply more aware of them, they are now of great concern to organizations and crisis management and communication is a priority. Most organizations have a crisis response plan; many have dedicated crisis and security management staff. Yet much of the emphasis has been on action outside of the organization. Neglecting communication between managers and employees, they risk poor, inconsistent crisis management and the very real possibility of crisis escalation. Crisis management, like charity, begins in the home. Internal Crisis Communication is one of the first guides to communication inside organizations, before, during and after a crisis - not just on the acute crisis phase - to provide a complete and holistic guide for managers that will help them manage and contain crises. It includes an in-depth real-life case study, referred to throughout, from the author's own experience, which makes practical application explicit and the methodology clear. Strengthened by rigorous academic research and tested in real-life crisis situations, the methods included in this book will be invaluable for communication professionals, security officers and crisis managers, as well as valuable reading for students and researchers interested in crisis and risk management.

Crisis Management

Crisis Response Crisis management is often viewed as a short-term response to a specific event. While that is a part of the crisis management process, Crisis Management in the New Strategy Landscape takes a long term approach and offers a strategic orientation to crisis management. The text follows a four stage crisis management framework: Landscape survey (anticipating crisis events), strategic planning (setting up the crisis management team and plan), crisis management (addressing the crisis when it occurs), and organizational learning (applying lessons from crisis so they will be prevented, or at least mitigated in the future). Features & Benefits - Strategic approach used throughout the text - New trends in crisis management - Material on business ethics - What to do after the crisis - Case studies and vignettes at the beginning and end of each chapter
